Dear Parent/Carer

ADVICE FOR CHILD TO SELF-ISOLATE FOR TEN DAYS (CLOSE CONTACT)

We have been made aware that we have a confirmed positive case of Coronavirus (COVID-19) at Christ the King Catholic High School

We have followed the national guidance and, following a risk assessment with Public Health England (PHE) advisers, have identified that your child has been in close contact with the individual who has had a positive test result for Coronavirus (COVID-19). In line with the national guidance, your child must stay at home and self-isolate up to and including **Saturday 3 July 2021**. Work will be set by individual teachers on Google Classroom. As this is based on the result of a Lateral Flow Test, should the confirmatory PCR test come back negative then we will contact you to inform you that your child can return to school immediately. However, if the PCR test is positive, then the isolation period still stands and you will not hear from us.

If your child is well at the end of the ten-day period of self-isolation, they can return to their usual activities and attend school as normal. In the meantime, school will be in contact with you regarding set work.

Other members of your household can continue normal activities, provided your child does not develop symptoms within the ten-day self-isolation period.

For more information, please see the guidance for contacts of people with confirmed Coronavirus (COVID-19) infection who do not live with the person:

<https://www.gov.uk/government/publications/guidance-for-contacts-of-people-with-possible-or-confirmed-Coronavirus-covid-19-infection-who-do-not-live-with-the-person>

What to do if your child develops symptoms of Coronavirus (COVID 19)

Having been identified as a close contact, if your child then develops symptoms of Coronavirus (COVID-19), they should remain at home for at least ten days from the date when their symptoms appeared. Symptoms of Coronavirus (COVID-19) are a new continuous cough, or a high temperature, or a loss of, or change in, their normal sense of taste or smell (anosmia). Anyone with symptoms will be eligible for a PCR test - this is the type of test that is normally available and can be arranged via <https://www.nhs.uk/ask-for-a-Coronavirus-test> or by calling 119.

People who do not have symptoms or have not tested positive using a Lateral Flow Device should not request a PCR test unless this has been specifically requested by Public Health England or the local authority.

All other household members who remain well must stay at home and not leave the house for ten days. This includes anyone in your ‘Support Bubble’.

The household isolation period includes the day the first person in your household’s symptoms started (or the day their test was taken if they did not have symptoms) and the next ten full days. This means that if, for example, your ten-day isolation period starts on the 15th of the month, your isolation period ends at 23:59 hours on the 25th and you can return to your normal routine.

Household members should not go to work, school or public areas, and exercise should be taken within the home. If you require help with buying groceries, other shopping or picking up medication, or walking a dog, you should ask friends or family. Alternatively, you can order your shopping online and medication by phone or online.

Household members staying at home for ten days will greatly reduce the overall amount of infection the household could pass on to others in the community.

If you are able, move any vulnerable individuals (such as the elderly and those with underlying health conditions) out of your home, to stay with friends or family for the duration of the home isolation period. If that is not possible, anyone with symptoms should try and stay as far away as possible from vulnerable members of your household.

For more information, please read PHE’s ‘Stay at Home’ guidance:

<https://www.gov.uk/government/publications/covid-19-stay-at-home-guidance/stay-at-home-guidance-for-households-with-possible-Coronavirus-covid-19-infection>

For most people, Coronavirus (COVID-19) will be a mild illness.

If your child does develop symptoms, you can seek advice from the nhs.uk website at <https://www.nhs.uk/conditions/Coronavirus-covid-19/check-if-you-have-Coronavirus-symptoms/>. If you are concerned about your child’s symptoms, or they are worsening you can seek advice from NHS 111 at <https://111.nhs.uk/> or by phoning 111.

How to stop Coronavirus (COVID-19) spreading

There are things you can do to help reduce the risk of you and anyone you live with getting ill with Coronavirus (COVID-19):

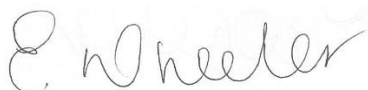

- wash your hands with soap and water often – do this for at least 20 seconds
- use hand sanitiser gel if soap and water are not available
- wash your hands as soon as you get home
- cover your mouth and nose with a tissue or your sleeve (not your hands) when you cough or sneeze
- put used tissues in the bin immediately and wash your hands afterwards

Further Information
